How To Read The Provider Listings

**1 Specialty:**
Descriptions of all specialties are listed alphabetically in the front of this directory.

**2 Board Certified?**
A board certified physician is one who, after completing a residency program, passes an examination administered by a group of specialists. Board certification does not guarantee quality and some qualified physicians may not be board certified. New physicians, for example, may not have been in private practice long enough to take their board examination. N/A means that there is no board certification in that specialty.
